Jan Markmann

Tech Lead / Engineering Manager

Tech Lead and Engineering Manager with a strong backend focus on PHP/Symfony, Docker, delivery, and production systems. Combines software craftsmanship, operations experience, and people leadership. Makes technical decisions with reliable delivery, clear standards, and business value in mind, and now works AI-first with coding agents, OpenAI Codex, Claude Code, OpenCode, and LLM-assisted workflows.

Experience

chargecloud GmbH

3 yrs 9 mos

Tech Lead Roaming

5 mos

Nov 2025 - Present

Cologne (remote)

AI-first Tech Lead for OCPI and interfaces in a Kotlin/PHP stack. The focus is on production-critical backend topics, technical documentation, and decisions around integration, operations, and business requirements in the roaming domain.

- Took responsibility for OCPI and interface topics in the roaming domain and aligned decisions with Product, Ops, and Engineering.
- Implemented OCPI in a mixed Kotlin/PHP stack and brought backend, integration, and operational requirements into a solution that was easy to maintain.
- Helped write technical documentation for interfaces and operational requirements, making alignment and implementation easier across the team.
- Made coding agents and LLM-assisted workflows a regular part of day-to-day engineering to move implementation, technical documentation, and research faster.
- Tech: Kotlin, PHP 8, Symfony, Docker, Helm, Kafka, MariaDB, OpenAI Codex, Claude Code, OpenCode

Team Lead IT / SysOps / DevOps

1 yr 11 mos

Dec 2023 - Oct 2025

Cologne (remote)

Led DevOps, IT, and SysOps with both technical and line management responsibility, coordinated external providers, and owned platform operations. The work covered CI/CD, container and Kubernetes setups, incident management, and information security topics.

- Led a DevOps, IT, and SysOps team of up to 8 with technical and line management responsibility, including coaching and stakeholder management.
- Built and improved CI/CD with GitLab and TeamCity and standardized release and deployment processes.
- Established incident management and closely monitored SLA-relevant systems for availability, resources, and alerting.

- Built, migrated, and operated Docker stacks and Kubernetes/Helm setups and documented the target architecture.
- Co-owned information security topics, maintained policies, and coordinated external providers.
- Tech: PHP 8, Symfony, Caddy, Docker, Helm, Kubernetes, GitLab, Renovate, TeamCity, Ansible, Harbor, Linux, Backstage

Senior Software Engineer & People Lead

1 yr 5 mos

Jul 2022 - Nov 2023

Cologne (remote)

Worked as a Senior Software Engineer on backend and platform topics and also took on People Lead responsibility. Alongside engineering work, the role included 1:1s, feedback, and supporting individual team members in day-to-day work.

- Worked on backend and platform topics in a PHP/Symfony environment and took technical responsibility within the team.
- Handled People Lead responsibilities for team members, including 1:1s, feedback, and support in daily collaboration.
- Moved deployments to Docker and introduced Ansible for repeatable infrastructure and operational workflows.
- Worked with Product, Ops, and Engineering on delivery and operational topics in day-to-day work.
- Tech: PHP 8, Symfony, Caddy, Docker, GitLab, TeamCity, Ansible, Linux

Senior Software Developer

Jan 2021 - Jun 2022

Digital Control GmbH & Co. KG

Dusseldorf (remote)

Developed and operated components in a Kubernetes-based microservice architecture focused on object storage, document generation, platform integration, and observability.

- Implemented a multi-tenant S3 storage solution as a reusable platform building block, including provisioning Kubernetes and MinIO resources from Symfony.
- Built a PDF generator for product data sheets within an e-commerce microservice architecture.
- Set up Grafana on top of Graylog data and made reliability metrics visible in a way that improved operational transparency and earlier problem detection.
- Tech: PHP 7, Symfony, Docker, Google Cloud Run, Kubernetes, MinIO, Rancher, GitLab, InfluxDB, Grafana, Graylog

Software Developer, Consultant & Interim Head of IT

Mar 2020 - Jan 2021

Self-employed

Cologne

Served as interim head of IT and consultant with a focus on IT/DevOps tooling, hiring support, delivery standards, and infrastructure consolidation. Also took over and stabilized Shopware 6 on AWS.

- Served as interim head of IT and helped shape hiring for SysOps and development roles.
- Built a reliable development and DevOps foundation for a junior Shopware team, including Docker, GitLab CI, and review apps.
- Built and integrated APIs based on REST and GraphQL, including MongoDB.
- Took over, consolidated, and operated Shopware 6 hosting on AWS (EC2).
- Consolidated and standardized local and external IT infrastructure to make it easier to operate and maintain.
- Tech: PHP 7, Shopware, Symfony, AWS, Caddy, Docker, GitLab/GitHub, MongoDB, Linux

Senior Software Developer

May 2019 - Mar 2020

Graph-IT GmbH

Cologne

Worked on an internal graph-based database system with a focus on data and process modeling. Also delivered industrial automation prototypes with Raspberry Pi and Python.

- Enhanced the internal graph database system (backend and domain model).
- Built and maintained APIs and integrations (GraphQL).
- Data and process modeling within the graph-based system; implemented process flows.
- Industrial automation prototyping with Raspberry Pi and Python (async) incl. fieldbus (Modbus/RS-485).
- Tech: GraphQL, PHP7, Python (async), Symfony, GitLab, Modbus/RS-485

Software Developer & Consultant

May 2017 - Apr 2019

Self-employed

Cologne

Freelance work in agency and enterprise environments, including e-commerce and DevOps. Focus: Symfony/PHP, integrations, and service-oriented architectures.

- Introduced or improved DevOps tooling and CI/CD workflows in project teams.

- Stabilized delivery and quality in an enterprise client project team within an agency setup.
- Enhanced internal applications for sales and process control in line with business needs.
- Implemented and adapted Spryker-based e-commerce requirements.
- Built REST APIs to connect satellite projects, including data export to an ERP system.
- Tech: Doctrine, PHP7, PHPUnit, Spryker, Symfony 3.x, GitLab, MySQL, PostgreSQL, RabbitMQ, Redis, Propel

Team Lead Software Engineering

Oct 2013 - Apr 2017

preis24.de GmbH

Dusseldorf

Led software engineering: maintained a legacy platform and designed and built a new service-oriented sales platform. Introduced agile practices and strengthened QA, CI, and DevOps standards, combining technical direction with hands-on execution.

- Technical and disciplinary leadership of the software engineering team, with responsibility for technical priorities and delivery.
- Introduced and evolved agile practices (Kanban, Scrum) and embedded them in the team.
- Kept the legacy platform stable and moving while preparing the transition to a new target architecture.
- Designed and built a new service-oriented sales platform as the technical replacement path out of the legacy system.
- Tech: Doctrine, PHP5, PHPUnit, REST/SOAP, Symfony2, GitHub, Travis CI, MongoDB, MySQL5, Redis, Jira, Zend Framework

Software Developer

Jul 2010 - Sep 2013

Questback

Cologne

Maintained and extended an enterprise feedback suite and developed new components. Also built a social media monitoring application.

- Developed new product components and modules within the Enterprise Feedback Suite.
- Built a social media monitoring application including API integrations.
- Implemented JSON-RPC and SOAP web services and integrated them into the existing system landscape.
- Maintained and extended the Enterprise Feedback Suite.

- Tech: PHP5, Symfony Components, Hudson/Jenkins, Social Media APIs, MySQL5, Assetic, Zend Framework

Software Developer and Consultant

Oct 2009 - Jul 2010

Self-employed

Freelance project work as software developer and consultant focused on PHP/MySQL and symfony 1.3–1.4.

- Project work as software developer and consultant.
- Tech: Java, PHP5, symfony 1.3–1.4, MySQL, Eclipse/OSGI, ezComponents, Linux, Smarty, Typo3, UML

Senior Software Developer / Team Lead

Oct 2008 - Oct 2009

silversurfer7 GmbH

Cologne

Senior engineering and team leadership in an agency environment, focusing on portal and platform development in cross-functional teams.

- Team and development lead in agency web projects.
- Built portals for the tourism industry.
- Built a product catalog for providers of security and surveillance technology.
- Tech: PHP5, Symfony, MySQL5, Internet-Booking-Engines, Propel, Zend Lucene Search

Software Developer

Feb 2008 - Oct 2008

best webnews GmbH

Cologne

Worked on a news aggregation portal, enriching content with metadata (including geographic data) and delivering partner integrations.

- Built and enhanced a news portal for aggregation and presentation.
- Implemented metadata enrichment (notably geographic) and partner embedding.
- Tech: CakePHP, PHP5, MySQL5, AJAX, Drupal, jQuery, Netvibes UWA

PHP Programmer

Jan 2006 - Jan 2008

Agentur Grintsch e.K.

Cologne

Software development for enterprise and mid-sized clients, including Epson Germany.

- Software development for enterprise and mid-sized clients, including Epson Germany.
- Built a printer leasing system.
- Built and maintained a product database.
- Tech: PHP5, Symfony, MySQL5, Propel, Zend Lucene Search

Education

Cologne University of Applied Sciences (Campus Gummersbach)

Dec 2003 - Dec 2005

Business Information Systems studies (no degree completed) in Business Information Systems

Oberberg Vocational College, Gummersbach

Dec 2000 - Dec 2003

State-certified IT Assistant, advanced technical college entrance qualification in Information Technology

Skills

Leadership

- Technical leadership
- Line management
- Mentoring
- Stakeholder management

Backend Engineering

- PHP 8.x
- Symfony
- API Platform
- REST

Platform & Cloud

- Docker
- Kubernetes
- Helm
- AWS
- GitLab CI
- Ansible

Architecture & Delivery

- Service-oriented architecture
- DDD
- Migration strategies
- CI/CD
- Release engineering

Integrations & Messaging

- GraphQL
- OpenAPI
- Kafka
- RabbitMQ
- OCPI

Quality & Reliability

- Automated testing
- PHPUnit
- Static analysis
- Test-Driven Development
- Incident management
- Observability

Security & Compliance

- ISO 27001
- ISMS
- Incident response
- Vulnerability management

Data Platforms

- MySQL
- MariaDB
- PostgreSQL
- MongoDB
- Redis

Collaboration & Ways of Working

- Scrum
- Kanban
- Jira
- Slack
- Confluence

AI & AI-first Engineering

- AI-first Development
- OpenAI Codex / Claude Code / OpenCode
- LLM-assisted code generation
- Prompt engineering

AI-assisted development workflows

Tooling around coding agents

Agentic workflows

Languages

German — Native

English — Fluent

Interests

Mountain biking

Trails, Dirt, Slopestyle

Music

Piano, Harmonica, Blues, Boogie Woogie

Smart Home

Home automation, Open systems, DIY electronics

Artificial Intelligence

LLMs in software development, Personal AI assistants and agent tooling, Agentic workflows

Baking
